Subject: MicroSoft Settlement

Dear Sirs:

A settlement that fails to punish Microsoft for its misdeeds and also fails to prevent similar future activities while strengthening Microsoft's position in the schools system is a craven dereliction of the gov'ts responsibilities to insure fair competition, avoid the formation of monopolies, and foster a marketplace where new ideas can flourish. The Justice Dept's position is a Computer Age Munich settlement- peace in our time.

Congratulations, you have lived down to my worst expectations. You are now deserving of the title "Chickens of the Bit".
